Application Process

So then here is the process...

Owner applies for a Business License

City assigns LICyyyy-xxx # to the project

Fire Department

Receives request for Business Licensing.

Assigns it to a Fire Marshal

Fire Marshal visits site and approves or denies request.

All BLD #'s/permits attached to the project must be closed for approval.

So in short it has nothing to do with us once we do our part on the construction end and close those permits.

Registered Design Professionals

Per Unified Fire Authority

Greater Salt Lake Fire Prevention Bureau

Fire Protection System Plan Review.

Comments: Where Third Party Plan Review is required use the following list.

Approved List

In accordance with Section 104.7.2 of the International Fire Code, the [Unified Fire Authority](#) will require a “technical opinion and report” (peer review) of all plans for the installation and/or modification of an automatic fire protection system, installation and/or modification of fire alarm and detection systems and related equipment, fire pumps and related fuel tanks, jockey pumps, controllers and related equipment, installation, modification, or removal from service of a standpipe system.

Exceptions to required peer reviews:

1. Installation of fire hydrants and underground fire protection supply lines.
2. Pre-engineered kitchen hood suppression systems.
3. Installation or relocation of less than 20 sprinkler heads.
4. Installation or relocation of less than 5 alarm/notification appliances or less.

The following companies and/or individuals have been approved by the Unified Fire Authority as design professionals who can conduct third party plan review. These companies/individuals cannot review plans or drawings that have been developed by their own firm or representatives.
