Alex,

**Budget figures:** for the 6,800 SF wood shop area ONLY.

Taking in to account provisioning to allow for expansion into the overall 13,800 SF remaining areas.

- Wet Suppression: 35,400 base price
- Fire Alarm: 13,800
- Annual Monitoring: 720 of the FACP
- Underground supply to the building for Fire from utility fire line:
- allow for \$20 to 30k

Guestimate.

All four above are required by Code. i.e: if you have a sprinkler suppression system, you must have the Alarms and the offsite monitoring.

In order to give you a more accurate figure, I suggest paying for the Designs Submit Permit work first.

\$3200 for alarms

\$7,800 for Wet Suppression.

(Design Submit Permit, Drawings CAD)

Then I can get a more accurate cost on underground and the installation work.

Cheers

**Arun (Mr.)**
